## EDUCATION

---

**George Mason University | Fairfax, VA**

**IT with a concentration in Cybersecurity**

**May, 2029**

**Certifications:** Workplace Readiness, Python, Linux Fundamentals

## EXPERIENCE

---

**Software/Web Freelancer | Self Employed**

**Oct 2023 - Present**

- Delivered 8+ websites and custom software solutions to small businesses and dental labs, handling full project lifecycle from requirements, deployment and maintenance.

**Tech Office Intern | South Lakes HS | Reston, Virginia**

**Aug 2023 - Aug 2024**

- Created an intuitive script which automated over 2500 student name card sorting with barcode scanners using the Deno runtime (*source: [maytees/slhs-namecards](https://github.com/maytees/slhs-namecards)*)
- Resolved 100+ IT tickets, troubleshooting classroom hardware/software issues and assisting with student device onboarding

## PROJECTS

---

**Reviseo | ([reviseo.app](https://reviseo.app)) | Source: ([maytees/reviseo](https://github.com/maytees/reviseo)) | Personal Project**

**Oct 2025 - Dec 2025**

- Built a SaaS tool that lets clients give feedback directly on live websites using annotated screenshots.
- Created an embeddable widget (single script tag) with invite only access and a dashboard to track feedback status.
- Spoke to multiple potential agency owners (B2B) and web freelancers (B2C) to find market validity.
- **Tech:** NextJS, Vite, Tigris (S3), Tailwind CSS, Framer Motion

**Spacemint AI | ([spacemintai.com](https://spacemintai.com)) Source Closed | Acquired**

**Dec 2025**

- Developed and sold an AI web app that turns floor plans into staged interior renders in under a minute.
- Implemented upload → style selection → image generation flow with credit based pricing and downloads.
- Acquired 14+ users prior to acquisition through social media marketing.
- **Tech:** Vercel AI SDK, NextJS, Tailwind, Google Gemini 3 Pro, Posthog, Tigris (S3), Polar Payments

**Arcade | ([modrinth.com/plugin/arcade](https://modrinth.com/plugin/arcade)) | Source: ([maytees/arcade](https://github.com/maytees/arcade)) | Personal Project**

**Aug 2023**

- Built and published a Minecraft survival minigame plugin with customizable game modes, reaching 6,000+ views.
- Refactored the entire plugin from Java to Kotlin; open-source project with 450+ followers/downloads.
- **Tech:** Java, Kotlin, PaperMC

**DENIS | Source: ([maytees/denis](https://github.com/maytees/denis)) | Personal Project**

**Aug 2023**

- Built a custom DNS server to learn Go; implemented core parts of [RFC 1035](https://rfc1035.com) (UDP listener, packet parsing, response construction).
- Implemented hardcoded DNS responses as a foundation; currently extending toward lookup tables, forwarding, caching, and a web interface to create DNS records.
- **Tech:** Go (No external libraries other than std)

**Epsonia | Source: ([epsonia/epsonia-rs](https://github.com/maytees/epsonia)) | Personal Project**

**March 2023**

- Built a cybersecurity scoring engine that evaluates system state against predefined checks (users, groups, configs) and applies points and penalties similar to CyberPatriot scoring.
- Rewrote the engine from TypeScript (Deno) to Rust, implementing modular checks, and stricter error handling.
- **Tech:** Rust, Typescript

## TECHNICAL SKILLS

---

**Languages:** Typescript, Rust, Java; Learning Go

**Other:** NextJS, React, Tailwind, Linux, Neovim, Deno

## OTHER EXPERIENCE

**Crew Member | Five Guys Inc | Reston, Virginia**

**Oct 2023 - Aug 2025**
